This historic, 1869 center-hall victorian has been meticulously renovated into a large, modern home just steps to downtown. On a substantial 42' x 125' lot, the detached property boasts 11' ceilings, original crown and baseboards, two fireplaces, and both formal and informal living. The celebrity-designed kitchen is massive and offers everything a chef could need and more. Large historic homes like this are a rare find downtown Toronto - especially with an impressive front lawn and porch, a deck off the kitchen perfect for summertime BBQs, sprawling gardens, double carport and hot tub tucked in the back.
