Tucked away in an unassuming boutique building of only 58 residences, this sprawling ~1700 sq ft suite is a rare find in the sea of typical downtown condos. Previously 3 bedrooms, this unit has been opened up and redesigned for optimal flow, entertaining, and practical everyday living. The stunning custom chef's kitchen flows into a generous dining room, living room and bonus family room all overlooking the iconic city skyline and greenery below. The luxurious primary suite boasts a large king-sized bedroom with wall-to-wall closets, separate dressing room, and gorgeous 5-piece bath. With a generous 2nd bedroom and sleek full 2nd bath, open concept laundry room, bonus den perfect for work-from-home demands and incredible ensuite storage at every turn, this space feels much more like a home than a condo. Underground parking and building amenities including gym, indoor pool and 24 hr concierge offer convenience in your everyday busy life. An opportunity like this doesn't knock often!
